

## ATP YAZILIM VE TEKNOLOJİ ANONİM ŞİRKETİ

### ENERGY POLICY

#### 1. Objective

The Energy Policy (“Policy”) of ATP Yazılım ve Teknoloji A.Ş. (“Company” or “ATP”) outlines the principles addressing energy-related topics. Through this Policy, ATP aims to closely follow the legislation, legal notices, and national and international policy changes related to sustainability, energy efficiency, environment, and climate management in the markets where it operates and to comprehensively analyze the potential impacts of such developments on the Company. Such analyses guide the Company in proposing practical solutions in alignment with corporate strategies, devising detailed plans, and introducing effective practices.

#### 2. Scope

This Policy covers all services provided by ATP and applies to all its employees and relevant third parties that contribute to the Company’s processes.

#### 3. Responsibility

This document is reviewed on an annual basis or as needed and kept up to date through necessary updates.

#### 4. Policy

ATP is a leading technology company that develops critical platforms, software, and services for diverse industries, starting with finance, hospitality, and energy. Through its brands – Tradesoft, Zenia, ATP Digital, and GreenX - ATP offers innovative technologies, aiming to create real value by enabling its corporate clients to gain competitive advantage and reduce costs in an environment of higher expectations. ATP strives to conduct its operations in accordance with international laws and national legislation while always aiming to build a safe work environment.

Guided by its mission of “Driving a Renewable Future”, ATP prioritizes sustainability, efficiency, and innovation in energy management strategies. As a testament to our corporate ethical values and social responsibility, we declare our commitment to promoting environmental sustainability and using renewable energy sources. Accordingly, we aim to minimize our energy consumption by adopting innovative and environmentally friendly energy solutions.

Detailing our goals of reducing energy consumption and adopting innovative and sustainable energy approaches, the Energy Policy lays out the following commitments, goals, requirements, and principles:

- The acquisition of I-REC certification for our electricity consumption in 2023 reinforces our commitment to renewable energy and to conducting our business in compliance with international standards.
- Aiming to bolster sustainability, we focus on renewable energy sources and promote sustainable methods in our energy consumption.
- We leverage energy efficiency programs and tools as key considerations of this Policy to monitor and assess our energy consumption. Accordingly, we aim to support environmental sustainability and economic efficiency.
- We develop strategies to continuously improve our energy use and operations.
- We aim for full compliance with national and international laws and regulations in our energy management activities.
- We design and deliver training programs to encourage the use of energy-efficient devices and equipment and to raise awareness.
- We keep our employees and business partners informed about energy savings and sustainability practices, aiming to develop sustainable transportation policies and choosing more efficient vehicles.
- We commit to make the Energy Policy accessible to all stakeholders and to ensure that it is understood and implemented.
- By managing our energy consumption and minimizing our carbon emissions, we aim to contribute to environmental stewardship.
- We adopt an energy-focused perspective to develop actionable solutions by analyzing risks and opportunities.
- We commit to build an energy-conscious culture and raise energy efficiency awareness, to monitor the implementation of policies and strategies, and to regularly review our energy management policy, aligning with the latest developments in technology and the industry.

ATP is committed to promoting renewable energy for a sustainable future and setting standards of excellence in energy management. This Policy, detailing the Company's energy management approach, is available to all employees, business partners, and stakeholders.
